CONTINUOUS NERVE BLOCK CATHETERS

STIMUCATH® CPNB CATHETER

Description:

The Arrow® StimuCath® Continuous Peripheral Nerve Block (cPNB) Catheter allows clinicians to objectively confirm accurate catheter tip placement through nerve stimulation, which can help improve secondary block success. The wire-reinforced catheter body and coil tip are visible under ultrasound, providing the clinician with additional feedback on the location of the catheter.

All StimuCath® Trays include:

- StimuCath® Continuous Peripheral Nerve Block Catheter
- Tuohy needle: specially designed to allow clinicians to retract the catheter, if necessary, back into the needle without withdrawing the needle and resticking the patient (see IFU for complete instructions).
- Stimulating SnapLock™ Catheter-Syringe Adapter
- StatLock® Stabilization Device

Safety Kits Include:

- 3mL ChloraPrep® with Hi-Lite Orange® Tint
- SnapTear® Drape with 5" fenestration
- Safety Injection Needles
- Procedural medications
- Procedural components and dressings

Kits Include:

- Procedural medications
- Procedural components and dressings

Sets Include:

- Basic procedural components
