HYPERINFLATION BAG SYSTEM

Description:

The Hudson RCI® Hyperinflation Bag System is designed to provide controlled or assisted ventilation to neonatal and pediatric patients in NICU, labor and delivery, or during patient transport.

- High quality, durable bag allows clinicians to feel the patient's lung compliance
- · Adjustable valve for fingertip control of system pressure
- Available with Star Lumen® Oxygen Tubing and 7 ft. pressure tubing
- Device options not made with natural rubber latex and DEHP are available
- Manometer option allows for convenient pressure monitoring
- Individually packaged: 20 to a case (without mask), 10 to a case (with mask)
