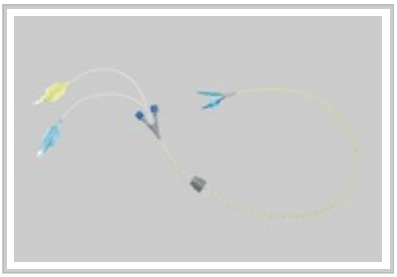
ENDOBRONCHIAL BLOCKERS

Teleflex is proud to offer the EZ-Blocker™ Endobronchial Blocker: an intuitive, secure solution for clinicians to achieve one-lung ventilation and reduce the risk of intraoperative malpositioning. It was designed by anesthesiologists who challenged accepted clinical practices and wanted a better way to treat patients.



RUSCH® EZ-BLOCKER™ ENDOBRONCHIAL BLOCKER

The unique bifurcated distal end of the Rusch® EZ-Blocker™ Endobronchial Blocker allows for the intuitive placement of the cuffs in the right and left bronchi. Once the Rusch® EZ-Blocker™ Endobronchial Blocker is advanced through the distal end of a single-lumen endotracheal tube, the bifurcated cuffs separate and are naturally directed into the left and right main stem bronchi.
