LARYNGOSCOPES

Teleflex is proud to continue a more than 125-year partnership between our Rusch® Brand and clinicians to develop laryngoscopes that make intubation as simple, convenient, and safe as possible. The result is a broad range of laryngoscopes that includes options to manage difficult airways and improve procedural efficiency. Each product is precisely engineered to meet the needs of anesthesia professionals and their patients.

FIBER OPTIC SINGLE-USE BLADES
Teleflex is proud to offer Green Rusch Lite™ Single-Use Fiber Optic Blades, which offer the performance of reusables, while presenting the opportunity to substantially reduce the potential for infection associated with reusable devices.

FIBER OPTIC SINGLE-USE HANDLES
Teleflex offers the Rusch® DispoLED® Single-Use Fiber Optic Laryngoscope Handle, which can be safely integrated with other compatible fiber optic/green systems in use in the hospital because of its ISO 7376 compliant fittings. This allows the Rusch® DispoLED® Laryngoscope Handle to be easily integrated into many existing laryngoscope systems, reducing the risk of incompatibility occurring in critical clinical situations.

STANDARD SINGLE-USE BLADES
Teleflex offers a variety of Rusch® Standard Single-use Disposable Blades that offer the performance of reusables, while reducing the risk of cross-contamination.

SINGLE-USE LARYNGOSCOPE SYSTEM
Concerns about proper cleaning of tools used for tracheal intubation have been growing as bacteria are becoming more resistant and no perfect decontamination procedures exist.¹ While most concerns about laryngoscope cleaning focus on the blade because of the patient contact, handles are becoming more of a concern as studies have shown that handles also carry bacteria.²

FIBER OPTIC REUSABLE BLADES
Teleflex is proud to offer Rusch® Fiber Optic Reusable Blades in a full range of styles and sizes.
FIBER OPTIC REUSABLE HANDLES
Rusch® Fiber Optic Reusable Handles have been continually refined through many years of use to minimize maintenance requirements and continue our tradition of the highest quality. They are made to exacting specifications from medical grade stainless steel to ensure their durability.

STANDARD REUSABLE BLADES
Teleflex is proud to offer Rusch® Standard Reusable Blades in a full range of styles and sizes.

STANDARD REUSABLE HANDLES
Teleflex offers a selection of standard reusable handles in a variety of finishes to meet your anesthesia needs.

GUIDED VIDEO LARYNGOSCOPES
Combining reposable optics with single-use blades, the Rusch® Airtraq™ Video Laryngoscope System® is an innovative way to assist clinicians with intubations from routine to the most complex. Our guided video single-use laryngoscope blades offer a reliable solution for accurate intubation while helping to reduce the risk of cross-contamination. Rusch® Single-Use Laryngoscope Blades offer the opportunity to reduce infection associated with reusable devices by delivering a new, sterile surface every time. The guided system helps clinicians place endotracheal tubes with accuracy and confidence.
