Concerns about proper cleaning of tools used for tracheal intubation have been growing as bacteria are becoming more resistant and no perfect decontamination procedures exist. While most concerns about laryngoscope cleaning focus on the blade because of the patient contact, handles are becoming more of a concern as studies have shown that handles also carry bacteria.

RUSCH® TRULITE SECURE™ SINGLE-USE LARYNGOSCOPE BLADE & HANDLE

The Rusch® TruLite Secure™ Single-Use Laryngoscope from Teleflex is a single-use solution that consists of a combined laryngoscope blade and handle. This innovative system offers the opportunity to reduce the potential for infection associated with reusable devices.
